

UNIVERSITY EDUCATIONAL PLAN “S. MARIA DEL ROSARIO”

Our aim with these facilities is to promote hospitality and educational support for off-campus university students. We hope that the life experience gained here, respecting different sensitivities and personal stories, can be an opportunity for human and Christian maturation, in-depth cultural and civic education, and growth in personal responsibility. We highlight the guidelines that steer the journey of the S. Maria del Rosario Residence and apartments, each according to their own responsibilities and competencies.

Objectives

PERSONAL RESPONSABILITY

With this project, we aim to create an experience driven by a culture of personal responsibility, capable of fostering freedom. We believe that freedom is nurtured by orienting oneself towards the common good, respecting community rules, taking care of both personal and communal spaces, and being considerate in living together.

MEANINGFUL RELATIONSHIPS

Our reality aims to be a context that encourages meaningful relationships, fostered through authentic bonds, time for meeting and dialogue, listening and exchange. For this reason, we envisage the Residence and apartments as an opportune occasion to create new connections between people of different ages, new friendships, thoughts, and regional backgrounds. Living together means inhabiting a shared time and space where one can learn to build a network of genuine relationships that help rediscover the sense of a community of friends in this unique phase of life.

CULTURAL VIBRANCY

We envision the spaces at S. Maria del Rosario as culturally vibrant and stimulating environments, helping individuals become active protagonists of culture and knowledge. Cultural vibrancy is based on academic commitment, class attendance, personal motivation, and the dedication to personal study time. At its core is the awareness that the future is built in the present, and that a qualified professionalism is determined by investing in one's intelligence from now.

THE PURSUIT OF LIFE'S MEANING

We are convinced that the pursuit of happiness is the true purpose of a young person's life. Therefore, we believe that the spiritual dimension gives depth and meaning to life, belonging to every individual. Through individual and group encounters and discussions, we aim to develop this awareness, respecting everyone's timing. In each of us, existential questions arise that we cannot ignore. The answers are born and strengthened within a meaningful relationship with the Christian community, which warmly welcomes every young person. Therefore, we promote meetings for all young people, to seek out Jesus of Nazareth, the true man and model of a fulfilled life.

METHODOLOGY

We aim to achieve our goals, which underpin the style of our proposal, by:

- providing concrete study support and monitoring academic commitment;
- requiring active and faithful participation in monthly training sessions, adherence to regulations, good communication norms, collaboration, and mutual correction;
- encouraging the free sharing of service experiences in charitable or parish settings;
- offering cultural education programs;
- scheduling periodic reviews of the overall experience, with personal interviews and discussions with the Management.

With this spirit, we therefore welcome every person who will live in the environments of S. Maria del Rosario.
